Santa Clara County Hazardous Waste
Drop Off Program
408-299-7300

www.ReduceWaste.org

The Recycling and Waste Reduction Commission of Santa Clara County and your City hope that this guide helps Santa Clara County builders, contractors, and residents to reuse and recycle construction and demolition materials.

Recycling & Waste Reduction Commission
of Santa Clara County and your City

Printed on 100% recycled paper with soy based inks.

Builder's Reuse and Recycling Guide

A Directory of Construction and Demolition Material Reuse and Recycling Firms

Reuse and recycle materials resulting from construction and demolition (C&D) projects.

Save money
by avoiding disposal cost.

Protect our environment
by avoiding unnecessary disposal of construction and demolition materials.

Recycling & Waste Reduction Commission
of Santa Clara County and your City

Business listings should not be construed as a recommendation or endorsement by the Recycling and Waste Reduction Commission of Santa Clara County, the County of Santa Clara, or your City.

Diversion of specific loads and materials is at the discretion of the facility.

City Recycling Contacts

Before you start, contact the city where the project is located for applicable regulations and requirements.

Salvage

Remove salvageable items first whenever you demolish part or all of a home or building. Salvage is the careful removal of reusable building materials before demolition.

Choose a facility that offers “Salvage/ Reusable Building Materials” from the following listings. Call facilities first to verify that salvageable materials are accepted.

Typical salvageable materials include:

- Architectural Details (columns, fireplace mantels, moulding)
- Cabinets
- Doors
- Lighting Fixtures
- Lumber
- Plumbing Fixtures
- Windows
- Wood Flooring and Fencing

Recycle Separated Materials

Discuss your recycling goals in advance with the recycling facility you plan to use. Call first to confirm that your materials will be accepted.

Separating construction and demolition debris by individual material type may result in lower recycling fees.

Some facilities will provide on-site recycling and collection of separated construction and demolition debris.* Call for details of on-site services.

Typical recyclable materials that can be separated at the job site include:

- Asphalt
 - Cardboard
 - Concrete
 - Metal
- Untreated Wood

Recycle Mixed Materials

If you are unable to separate construction and demolition debris at your job site due to space constraints or other restrictions, you may still be able to recycle mixed construction/ demolition debris. Check the listing for facilities that accept “Mixed Construction/Demolition Debris.”

Some facilities will provide on-site recycling and collection of mixed construction and demolition debris.* Call for details of on-site services.

Not Recyclable!

Garbage such as lunch waste, food packaging and dirty drop cloths are not recyclable.

Hazardous Waste such as asbestos-containing materials, solvents, paint thinners, mercury switches, pressure-treated and creosote-treated wood are not recyclable.

Call the Santa Clara County Hazardous Waste Drop Off Program at (408) 299-7300 for information on proper handling and disposal of hazardous wastes.

Call First

Be sure to comply with city requirements. Call the city where your project is located for information on local disposal, recycling requirements and services.

The reuse and recycling industry constantly changes. Call your selected recycling facility to confirm charges, hours of operation, materials accepted, and material preparation requirements.

To suggest businesses or changes to future editions of this guide, email ReduceWaste@era.sccgov.org or call the Santa Clara County Recycling Hotline (800) 533-8414.

* Call your city to insure compliance with city requirements.
