Join Brick Tech this fall for in-person LEGO® building fun! Each workshop will feature STEM concept introduction, engaging participants in exciting hands-on interactive learning!

Participants will build two projects in each workshop to learn about STEM concepts through building with LEGO® materials. Motorized and moving projects will be built in addition to structure-based projects.

COVID-19 safety precautions will be followed and all participants will be required to wear a mask for the full duration of the camp. LEGO® material kits will be assigned to each individual participant for the class and will not be shared with others. LEGO® materials used in the camp will not be taken home.
